To: Facilities Services Staff

Good Morning FS,

Yesterday, a flooring consultant informed Tony that the Arena floor does not require replacement because of water damage from the October 13th storm. This is great news and eliminates well over \$500,000 of insurance claims.

I want everyone to understand the floor has been saved as a direct result of the quick response and efforts FS personnel. Tyrone and several of his folks mopped up water, and Michael Benton spent several hours riding the floor scrubber removing water from the floor at 2:30 in the morning on October 14th. Because of their collective efforts to get water off the floor early, drying equipment that has been in operation for the past month has worked effectively to mitigate any water damage. Accordingly, the floor will only have to be sanded and re-finished during Summer Break with minimal impact on Arena operation and without subjecting the bleacher systems to the wear and tear from removal and reinstallation.

Because of our timely and professional response, the University has not lost use of the Arena - and in fact, just hosted the NCAA Women's Volleyball Finals. Everyone in Facilities should be proud of this great success. I hope you know that we recognize this and appreciate it!

Thanks,
Kevin
